### Special offers available for global learners!

Hebrew Global Learning uses the **Hebrew Bible as the tutor and trainer** enabling the learner to do exercises created by the Biblical text. Learners define their own individual goals and can study and practice online any time they want. Personal dedication is the only limit!

This course material was created and tested over two decades as we developed the revolutionary **Bible Online Learner** learning environment now hosted by the Nida Institute for Biblical Scholarship (see <https://learner.bible/>).

Learners are introduced online to grammatical topics and vocabulary through texts and videos and then immediately test and deepen their understanding through exercises on the Hebrew text. They become highly motivated by engaging with the Bible from day one. They get instant response from the text and decide how much they want to practice and when. They monitor their own progress and can compare with the performance of others. This learning method can be adapted to personal studies or other Hebrew programs, and learners can study for a certificate or an exam.

Learners can choose between three different levels:

**Beginner level.** Learners master reading of the creation story in Genesis 1 after some 30-40 hours of work. They also learn the basics about the use of the noun and the most frequent verb forms in Biblical Hebrew. They become familiar with the 100 most frequent vocabulary words. Intensive online start-up for new groups will be announced.

**Basic level.** Learners are gradually introduced to all the verb forms of the basic conjugation (the *qal*) and the other stems in their regular and irregular forms and all other areas of the grammar. They practice the 300 most frequent vocabulary words in the language while continuing to study Genesis 1-3 for practice and reading.

**Advanced level.** Covers 25 additional pages of Biblical Hebrew from the Stuttgartensia Edition. Only learners who have passed the tests at the end of the Intermediate level should proceed to this level.

**Online Master Class** begins August 19-23, 2024, with an intensive upstart at the Wycliffe Ethiopia Academy in Addis Abeba and can be followed online. In the Autumn learners will practice reading of texts, have question time and are introduced to grammatical topics in the texts. This online course is designed for students preparing for admission in academic programs, training as translation advisors or to become certified instructors for Global Learning Initiative.

**Data-driven learning** was presented at SBL International in Amsterdam August 31, 2024. See the impressive and promising results from a pilot project with three students in small towns in Ethiopia (<https://mbh.theonlineprofessor.org/mod/resource/view.php?id=1484>).

**Learning any language takes hundreds of hours and effort.  
Our solution is perfect for dedicated and self-driven students  
who get absorbed in their learning activities, like in a game,  
and they enjoy their progress.**
